

Subject: Clearshift information security status

Primesec is a consulting firm providing advisory and audit services in the field of information security, privacy and cyber protection, including review of ISO27001 and GDPR compliance for public and private companies. Primesec was engaged by the Clearshift group to perform an audit and gap analysis of their information systems, including compliance with the 2017 Israeli Protection of Privacy Regulations.

Our reviewed showed a strong data protection program at Clearshift that complies with legal and industry standards for data protection and privacy. No critical vulnerabilities were uncovered. Recommendations for improvement were shared with senior management. Clearshift's databases are registered as required by the Israel Privacy Protection Act.
